The last decade has seen an incredible growth in the production and distribution of images and other cultural artefacts. The internet is the place where all these cultural products are stored, classified, voted, collected and trashed. What is the impact of this process on art making and on the artist? Which kind of dialogue is going on between amateur practices and codified languages? How does art respond to the society of information? This is a book about endless archives, image collections, bees plundering from flower to flower and hunters crawling through the online wilderness. It is a shameful thing to win a war. The reliably unorthodox Curzio Malaparte's own service as an Italian liaison officer with the Allies during the invasion of Italy was the basis for this searing and surreal novel, in which the contradictions inherent in any attempt to simultaneously conquer and liberate a people beset the triumphant but ingenuous American forces as they make their way up the peninsula. Malaparte's account begins in occupied Naples, where veterans of the disbanded and humiliated Italian army beg for work, and ceremonial dinners for high Allied officers or important politicians feature the last remaining sea creatures in the city's famous aquarium. He leads the American Fifth Army along the Via Appia Antica into Rome, where the celebrations of a vast, joy-maddened crowd are only temporarily interrupted when one well-wisher slips beneath the tread of a Sherman tank. As the Allied advance continues north to Florence and Milan, the civil war intensifies, provoking in the author equal abhorrence for killing fellow Italians and for the "heroes of tomorrow," those who will come out of hiding to shout "Long live liberty" as soon as the Germans are chased away. Like Céline, another anarchic satirist and disillusioned veteran of two world wars, Malaparte paints his compatriots as in a fun-house mirror that yet speaks the truth, creating terrifying, grotesque, and often darkly comic scenes that will not soon be forgotten. Unlike the French writer however, he does so in the characteristically sophisticated, lush, yet unsentimental prose that was as responsible for his fame as was his surprising political trajectory. The Skin was condemned by the Roman Catholic Church, and placed on the Index Librorum Prohibitorum.

This is neither a manual claiming to be a popular summary nor a systematic treatment of the art of the wall poster. It is an original work, of vast scope, structured into independent essays organised along a cohesive timeline, from 1880 to the second half of the twentieth century, reflecting on various aspects of artistic advertising graphics in an interdisciplinary dimension and with an international perspective. From the establishment of the poster as an innovative form of large-circulation visual communication and from its emancipation from the painting aesthetics of the nineteenth century to the understanding of the influences of advertising on the Pop Art experiences of the 1960s, according to a logic of inverted relations. The constant points of reference show the relations not only with painting but also with graphic processing and design, publishing graphics, original prints and photography; in the background, there also is cinema, decorative arts and urban furnishing. Artists, schools, movements, trade magazines, the book industry, exhibitions and performances, business advertising, political and war propaganda, social topics: these are some of the subjects and phenomena that interact in the history of advertising languages, which have been framed here by the specialist expertise of six authors. There is also the recurrent emergence of the dialects around the instruments and purposes of advertising communication, between practice and experimentation, commercial requirements, professional training and creative demands.
