3 New York Times bestseller in hardcover. David Weber New York Times, USA Today, Wall Street Journal and international bestselling phenomenon delivers book #13 in the multiple New York Times best-selling Honor Harrington series. Honor Harrington faces down a powerful attack by a corrupt and powerful star empire while rooting out a deadly plot to enslave the entire human-inhabited galaxy. Peril and strife strike on a double front for Honor Harrington and company. After a brutal attack on the Manticoran home system, Honor Harrington and the Star Kingdom she serves battle back against a new, technologically powerful, and utterly nefarious enemy. And as if that weren ’ t task enough, Honor must also face down a centuries-old old nemesis in the crumbling, but still mighty, Solarian League. The war between the People ’ s Republic of Haven and the Star Kingdom is finally won and peace established, but grave danger looms – for there is a plan well on its way to completion designed to enslave the entire human species. Behind that plan lies the shadowy organization known as the Mesan Alignment. Task number one for Honor is to defend against another devastating Mesan strike – a strike that may well spell the doom of the Star Kingdom in one fell blow. It is time to shut down and secure the wormhole network that is the source of the Star Kingdom ’ s wealth and power – but also its greatest vulnerability. Yet this is an act that the ancient and corrupt Earth-based Solarian League inevitably will take as a declaration of war. The thunder of battle rolls as the Solarian League directs its massive power against the Star Kingdom. And once again, Honor Harrington is thrust into a desperate battle that she must win if she is to survive to take the fight to the real enemy of galactic freedom – the insidious puppetmasters of war who lurk behind the Mesan Alignment! About A Rising Thunder: “ Intrigue and counter-intrigue heighten the tension in Weber’s 13th Honor Harrington novel. . .as the author highlights the complex maneuverings of government leaders in this politically savvy. . .novel that bridges the gap between the last novel and the expected sequel. ” —Publishers Weekly About Mission of Honor, #12 in the Honor Harrington series: “ Weber combines realistic, engaging characters with intelligent technological projection and a deep understanding of military bureaucracy in the long-awaited 12th Honor Harrington novel....Fans of this venerable space opera will rejoice to see Honor back in action. ” — Publishers Weekly “ This latest Honor Harrington novel brings the saga to another crucial turning point...Readers may feel confident that they will be Honored many more times and enjoy it every time. ” —Booklist About David Weber and the Honor Harrington series: “ . . .everything you could want in a heroine....excellent...plenty of action. ” — Science Fiction Age “ Brilliant! Brilliant! Brilliant! ” — Anne McCaffrey “ Compelling combat combined with engaging characters for a great space opera adventure. ” —Locus “ Weber combines realistic, engaging characters with intelligent technological projection. . .Fans of this venerable space opera will rejoice. . . ” — Publishers Weekly

A ground-breaking account of the first 24 hours of the D-Day invasion told by a symphony of incredible accounts of unknown and unheralded members of the Allied – and Axis – forces. Seventy-five years have passed since D-Day, the greatest seaborne invasion in history. The outcome of the Second World War hung in the balance on that chill June morning. If Allied forces succeeded in gaining a foothold in northern France, the road to victory would be open. But if the Allies could be driven back into the sea, the invasion would be stalled for years, perhaps forever. An epic battle that involved 156,000 men, 7,000 ships and 20,000 armoured vehicles, the desperate struggle that unfolded on 6 June 1944 was, above all, a story of individual heroics – of men who were driven to keep fighting until the German defences were smashed and the precarious beachheads secured. This authentic human story – Allied, German, French – has never fully been told. Giles Milton ’ s bold new history narrates the day ’ s events through the tales of survivors from all sides: the teenage Allied conscript, the crack German defender, the French resistance fighter. From the military architects at Supreme Headquarters to the young schoolboy in the Wehrmacht ’ s bunkers, Soldier, Sailor, Frogman, Spy, Airman, Gangster, Kill or Die lays bare the absolute terror of those trapped in the front line of Operation Overlord. It also gives voice to those who have hitherto remained unheard – the French butcher ’ s daughter, the Panzer Commander ’ s wife, the chauffeur to the General Staff. This vast canvas of human bravado reveals ’ the longest day ’ as never before – less as a masterpiece of strategic planning than a day on which thousands of scared young men found themselves staring death in the face. It is drawn in its entirety from the raw, unvarnished experiences of those who were there.

Grammar and Beyond is a four-level North American grammar course informed by a collection of over one billion words of authentic language, ensuring that students learn grammar the way it is used in real spoken and written English. The series places special emphasis on grammar for writing. CEF: B2-C1.

This manual applies to Air Force active duty, Air Force Reserve, Air National Guard, emergency essential civilians and contract personnel. This manual contains the latest changed approved by the Air Force effective JUNE 24, 2011. It compiles existing war skill tactics, techniques, and procedures from many sources into a pocket-sized, quick reference guide. This manual implements AFPD 10-25, Emergency Management, and incorporates provisions of various International Agreements and Conventions, US Codes, DOD Directives, Chairman of the Joint Chiefs of Staff Command Instructions, Uniform Code of Military Justice, Air Force Instructions, Manuals, Pamphlets, Visual Aids and Handbooks; AF Occupational Safety and Health Standards, Technical Orders, Guides, and Concepts of Operation. As an expeditionary Airman you must stay ready to deploy anywhere in the world on short notice. This manual doesn't contain everything you must know. It doesn't focus on the integrated joint or multinational nature of combat operations. It doesn't replace regulations or local procedures you'll need to follow. This manual does, however, cover basic warfighting skills and points of knowledge with the intent to help you successfully complete the mission. The tasks outlined in this manual apply at both deployed and home station locations. Keep the Airman's Manual close to you; use it while training and exercising for contingencies and deployments. Refer to it often... you'll need it. Fly, Fight, and Win! AFPAM 10-100.

Examines the reasons behind the success of Toyota as the world's number one automaker, focusing on its history, the abilities of its senior management, and the power of its corporate culture.

One hundred years ago electric cars were the most popular automobiles in the world. In the late nineteenth century and at the start of the twentieth century, they outsold every other type of car. And yet, within a couple of decades of the start of the twentieth century, the electric car had vanished. Thousands of battery-powered cars disappeared from the streets, replaced by the internal combustion engine, and their place in the history of the automobile was quietly erased. A century later, electric cars are making a comeback. Fears over pollution and global warming have forced manufacturers to reconsider the electric concept. A History of Electric Cars presents for the first time the full story of electric cars and their hybrid cousins. It examines how and why electric cars failed the first time - and why today's car manufactureres must learn the lessons of the past if they are to avoid repeating previous mistakes all over again. The book examines in detail: Early vehicles such as the Lohner-Porsche petrol-electric hybrid of 1901; Key figures in the history of the electric car development such as Henry Ford; Sir Clive Sinclair's plans to build a number of electric vehicles, designed to sit alongside the Sinclair C5; The return of the electric technology to vehicles as diverse as the NASA Lunar Rover, commuting vehicles and supercars; Future developments in electric cars. For the first time the full story of electric cars and their hybrids are examined.The hidden past of the electric automobile is uncovered and its future developments are discussed. Superbly illustrated with 300 colour photographs, many of which are rare and original sketch designs. Nigel Burton has written and lectured on cars and automotive history for more than twenty years.

Sean Reilly and Tess Chaykin, the heroes of Raymond Khoury's New York Times bestselling Templar novels, return in an edge-of-your-seat thriller that reaches from the present day back to 1700s Mexico—and beyond. . . What if there was a drug, previously lost to history in the jungles of Central America, capable of inducing an experience so momentous—and so shocking—that it might shake the very foundations of Western civilization? What if powerful forces on both sides of the law launched a ruthless, no-holds-barred pursuit to get their hands on it? What if FBI agent Sean Reilly and archaeologist Tess Chaykin were the only ones who could stop the unthinkable from happening? And what if they ’ re already too late?

"Software Testing: Principles and Practices is a comprehensive treatise on software testing. It provides a pragmatic view of testing, addressing emerging areas like extreme testing and ad hoc testing"--Resource description page.

Karak and Ashhur create a world in which its people do not age if they remain devoted to their deities, but the brothers' opposing goals become apparent when Karak's exiled children build a temple for worshippers who refuse to honor them.
