Learn to prioritize patient care quickly and effectively! Conceptual Care Mapping: Case Studies for Improving Communication, Collaboration, and Care uses a 'two books in one' approach to guide you through the most important aspects of patient care and critical thinking. The first section explores the title's three C's of care, communication, and collaboration within the healthcare team. The second section includes case studies that progress from simple clinical conditions to the more complex. Conceptual Care Mapping provides the tools you need to understand and implement effective patient care plans. With mapping practice both online and in the text, this unique book is the ideal resource for any first-year nursing student! Unique! Conceptual Care Mapping guides your care - using templates and an online, interactive conceptual care map creator - from the author team who developed this new method of organizing care information. Unique! 30 case studies focus on the patients you are most likely to see in clinical experience as a first-year student - and are organized from simple to complex, guiding you through prioritization and teaching you to think critically. Unique! Elsevier's Conceptual Care Map (CCM) creator helps you create, update, manage, and submit care maps quickly and effectively. Unique! Answers and completed care maps are provided for selected cases to reinforce what you've learned. Unique! Improving Patient Care section not only provides an overview of care mapping, but also focuses on three key elements of patient care: care, communication (both with other healthcare professionals and with patients), and collaboration. Unique! Interprofessional Education (IPE) and collaboration are key elements in all of the case studies, helping you understand how you will work within the larger healthcare team. Full-color design makes it easier to match up your online care mapping with content in the text.

This innovative case study review for community health nursing students features a unique format that facilitates active learning through the use of unfolding case studies. Unlike other content review books, it builds content right into vivid case studies to foster greater retention of the material. Additionally, because these case studies evolve over time, they mimic real-life situations and help students to develop critical thinking and organizational skills. The Review features, in great depth, the spectrum of requisite community health nursing information with the inclusion of current Quality & Safety Education (QSEN) competencies. It covers patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. The Review is enhanced by such mobile device resources as PubMed and AHRQ guidelines to simulate the method nurses currently use to access clinical information. These web links and resources are incorporated into the unfolding cases to further replicate realistic clinical situations in which the point-of-care/point-of-need access to information is used for decision support. Community Health Nursing Test Success will serve as both a course review and NCLEX-RN review with embedded links to access further information. It includes over 200 NCLEX-style questions in a variety of formats. Key Features: Uses unfolding case studies to mimic actual practice situations Embeds content into unfolding case studies to facilitate active learning Uses mobile device resources to simulate a true clinical environment Serves as both a course review and an NCLEX-RN review Builds web links and resources into unfolding case studies to replicate realistic clinical situations

Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback. Real-world scenarios offer the opportunity to analyze clinical situations likely to be encountered in today's primary care settings, providing practice in clinical reasoning skills. Day in the Office format presents cases hour by hour, in the way a typical clinical day might unfold. Emphasis on problem-based learning helps you to think critically and analyze clinical situations - such as ear infections, diarrhea, and coughing and fever - in order to provide appropriate primary care. Six NEW cases are included (for a total of 50), with three focusing on older clients with more complex health challenges, one addressing unplanned pregnancy, and two addressing practice management issues. NEW! Emphasis on follow-up care addresses patients coming to the primary care setting from retail clinics, rehabilitation settings, or acute-care settings, and underscores the importance of interprofessional collaboration. NEW! Enhanced patient diversity includes cases for all age groups, and reflects a more contemporary appreciation of cultural diversity and gender/gender identity. NEW! Updates to all cases ensure that case studies and feedback are consistent with the latest research evidence, clinical practice guidelines, and national and international treatment standards. NEW! Online answer submission allows you to write Assessment and Plan answers in the printed book, then submit answers online for grading and feedback. NEW! Grading rubrics are provided on the companion Evolve website to help you develop your answers. NEW! Introduction explains how to get the most out of the book.

Gain expertise in primary care of older adults with a case-based approach to geriatric primary care and multimorbidity management. Written by two leading academic and clinical experts in geriatric primary care, Case Studies in Geriatric Primary Care and Multimorbidity Management, 1st Edition uses detailed Exemplar Case Studies and Practice Case Studies to teach you how to think like an expert geriatric clinician. Because most older adults have more than one condition when seeking care, both Exemplar and Practice Case Studies place a strong emphasis on "multimorbidity" management. (The management of patients with a host of complex, interacting conditions). To provide extensive practice in learning how to think like an expert, case studies reflect the reality that care does not necessarily begin or end in the primary care setting. Cases therefore move fluidly from primary care to acute care to inpatient rehabilitation to assisted living to long-term care. Building on foundational introductory chapters, cases also call on you to develop interprofessional collaboration skills and reflect the diversity of today's older adults, in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more! As you work through both basic-level and advanced Practice Case Studies, you can make extensive notes in the printed book and then go online to submit answers for grading and receive expert feedback for self-reflection. NEW! Introductory unit on the core principles of caring for older adults gives you a strong foundation in the principles of geriatric primary care and multimorbidity management. NEW! and UNIQUE! Exceptionally detailed, unfolding Exemplar Case Studies demonstrate how an expert advanced practitioner "thinks clinically" to provide care to older adults with multiple conditions. NEW and UNIQUE! Exceptionally detailed, unfolding Practice Case Studies emphasize patient diversity and multimorbidity management across healthcare settings to help you develop advanced clinical reasoning skills for geriatric primary care. NEW and UNIQUE! Strong emphasis on multimorbidity management focuses on caring for older adults with multiple chronic conditions. NEW! Emphasis on the continuum of care across settings reflects the reality that care does not necessarily begin or end in the primary care setting but can move from primary care to acute care to inpatient rehabilitation to assisted living to long-term care, and so forth. NEW! Online answer submission for grading and expert feedback for self-reflection. NEW! Emphasis on patient diversity reflects the makeup of today's older adult, population in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more. NEW! Emphasis on interprofessional collaboration use Exemplar Case Studies and Practice Case Studies to allow you to demonstrate your interprofessional collaboration skills.

Gain a better understanding of the nurse's role in caring for populations and the community.
