Nail your A2 EMPA. I have taught, marked and moderated A-level ISAs and EMPAs for AQA and from this written the only specific guide for this exam. With my knowledge of common mistakes and mark schemes I am sure that this is an effective and comprehensive guide to the hardest parts of the process - experimental design and statistics. Most students seem to get themselves in knots, mainly because their teachers don't really understand it. By reading and understanding the theory, following the worked examples and finally completing the exam style questions, you will be doing everything you can to get your best mark in the exam. As with all exams the same questions keep coming up. Make sure you know what they are AND how to answer them. What this book is: An educational resources reviewing the use of statistics and the three statistical tests you need to be familiar with for your EMPA. Exam style questions on experimental design with exemplar answers based on previous mark schemes. It clearly walks through when each statistical test is used, includes worked examples and then an exam style question with a following mark scheme based on previous past papers. It comprehensively and thoroughly sets you up for task 1 and 2 as well as section A of the written paper. It also gives some insight into the style of questions in section B. What it is not: Written based on having seen this coming year's exam. This is not cheating!

Exam Board: AQA Level: AS/A-level Subject: Biology First Teaching: September 2015 First Exam: June 2016 Ensure your students get to grips with the core practicals and develop the skills needed to succeed with an in-depth assessment-driven approach that builds and reinforces understanding; clear summaries of practical work with sample questions and answers help to improve exam technique in order to achieve higher grades. Written by an experienced teacher, this Student Guide for practical Biology: - Help students easily identify what they need to know with a concise summary of required practical work examined in the A-level specifications. - Consolidate understanding of practical work, methodology, mathematical and other skills out of the laboratory with exam tips and knowledge check questions, with answers in the back of the book. - Provide plenty of opportunities for students to improve exam technique with sample answers, examiners tips and exam-style questions. - Offer support beyond the Student books with coverage of methodologies and generic practical skills not focused on in the textbooks.

This practical write-in workbook is the perfect companion for the coursebook. It contains step-by-step guided investigations and practice questions for Cambridge International AS & A Level Biology teachers and students. Through practical investigation, it provides opportunities to develop skills- planning, identifying equipment, creating hypotheses, recording results, analysing data, and evaluating. The workbook is ideal for teachers who find running practical experiments difficult due to lack of time, resources or support. Sample data- if students can't do the experiments themselves - and answers to the questions are in the teacher's resource.
