Written by admin. SIMATIC S7-300 is the modular mini PLC system for the lower and medium performance ranges (Fig. 1.1). Different versions of the controllers allow the performance to be matched to the respective application. Depending on the requirements, the programmable controller can be expanded by input/output modules for digital and

Hans Berger Published On

October 2012

The SIMATIC automation system unites all the subsystems of an automation solution under a uniform system architecture to form a homogenous whole from the field level right up to process control. The Totally Integrated Automation (TIA) concept permits uniform handling of all automation components using a single system platform and tools with uniform operator interfaces.
