With a wealth of updated material, rewritten chapters and additional case studies, this fourth edition of a hugely important work gives a broad and up-to-date overview of the concepts underlying APS. Special emphasis is given to modeling supply chains and implementing APS successfully in industrial contexts. What's more, readers' understanding is enhanced by several case studies covering a wide range of industrial sectors. What makes this book so crucial is that Supply Chain Management, Enterprise Resources Planning (ERP), and Advanced Planning Systems (APS) are concepts that must be mastered in order to organize and optimize the flow of goods, materials, information and funds. Here, leading experts provide insights into the concepts underlying APS.

This comprehensive edited volume is the first of its kind, designed to serve as a textbook for long-duration business analytics programs. It can also be used as a guide to the field by practitioners. The book has contributions from experts in top universities and industry. The editors have taken extreme care to ensure continuity across the chapters. The material is organized into three parts: A) Tools, B) Models and C) Applications. In Part A, the tools used by business analysts are described in detail. In Part B, these tools are applied to construct models used to solve business problems. Part C contains detailed applications in various functional areas of business and several case studies. Supporting material can be found in the appendices that develop the pre-requisites for the main text. Every chapter has a business orientation. Typically, each chapter begins with the description of business problems that are transformed into data questions; and methodology is developed to solve these questions. Data analysis is conducted using widely used software, the output and results are clearly explained at each stage of development. These are finally transformed into a business solution. The companion website provides examples, data sets and sample code for each chapter.

Traditionally, international business (IB) texts survey the field from a U.S. perspective, going on to compare the U.S. to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the U.S. angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective". In accomplishing the U.S. and the Reverse Perspective approaches, the authors interview business executives and politicians from a number of countries, i.e. the U.S., Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, Russia, etc. The interviews are incorporated at appropriate points in the text as first-hand information providing a multinational flavor to IB from each country's representatives. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics * Covers international business issues from a multinational perspective. A focus on different groups of countries, i.e. developed, newly developed, developing, EU. * Unique structure with multinational issues covered in the first four parts. Then specific countries of the world presented in the fifth part where multinational/IB issues from the first four parts become especially meaningful. * Each chapter features the Reverse Perspective Case that provides material for discussion and/or case analysis from a global perspective not necessarily that of the U.S * Website to support the text and lecturer
