Cardiac catheterisation is an invasive diagnostic procedure that provides important information about the structure and function of the heart. It usually involves taking X-rays of the heart's arteries (coronary arteries) using a technique called coronary angiography or arteriography. The resulting images are known as coronary angiograms or arteriograms.

Cardiac catheterisation and coronary angiography - NHS

Please note, there are teams on call 24-7 for both ischaemic (heart attacks etc) and heart rhythm problems.

Cardiovascular - Barts Health NHS Trust

A cardiac catheterisation, or coronary angiogram, is a special test to find out if you have any problems with the coronary arteries (blood vessels that supply the heart muscle with oxygen), and to find out how well the pumping chambers and valves in your heart are working. A cardiac catheterisation will give your doctor information about your heart that they cannot always get from other tests.

Cardiac catheterisation - Cardiology | BMI Healthcare UK

Cardiac catheterisation is a procedure in which a very thin plastic catheter is passed into the chambers of the heart. The catheter can also be passed into the main blood vessels of the heart (the coronary arteries).

Cardiac Catheterisation. Heart problems; information | Patient

During cardiac catheterization, a long thin tube called a catheter is inserted in an artery or vein in your groin, neck or arm and threaded through your blood vessels to your heart. Using this catheter, doctors can then do diagnostic tests as part of a cardiac catheterization. Some heart disease treatments, such as coronary angioplasty and coronary stenting, also are done using cardiac catheterization.

Cardiac catheterization - Mayo Clinic

This publication demystifies many difficult topics in interventional cardiology and cardiac catheterisation, commencing with the basics of laboratory instrumentation and technology and progressing to a comprehensive review of both new and established cardiac interventions.

Cardiac Catheterization: Purpose, Procedure, Risks, Results

In 1929, while working in Eberswalde, he performed the first human cardiac catheterization. He ignored his department chief and persuaded the operating-room nurse in charge of the sterile supplies, Gerda Ditzzen, to assist him. She agreed, but only on the promise that he would do it on her rather than on himself.
