Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

How did life originate on Earth? For over 50 years, scientists believed that life was the result of a chemical reaction involving simple molecules such as methane and ammonia cooking in a primordial soup. Recent space observations have revealed that old stars are capable of making very complex organic compounds. At some point in their evolution, stars eject those organics and spread them all over the Milky Way galaxy. There is evidence that these organic dust particles actually reached the early Solar System. Through bombardments by comets and asteroids, the young Earth inherited significant amounts of stardust. Was the development of life assisted by the arrival of these extraterrestrial materials? In this book, the author describes stunning discoveries in astronomy and solar system science made over the last 10 years that have yielded a new perspective on the origin of life. Other interesting topics discussed in this book: The discovery of diamonds and other gemstones in space; The origin of oil; Neon signs and fluorescent lights in space; Smoke from the stars; Stardust in our hands; Where oceans come from; The possibility of bacteria in space.

This stunning fantasy inspired by Chinese folklore is a companion novel to *Starry River of the Sky* and the New York Times bestselling and National Book Award finalist *When the Sea Turned to Silver*. In the valley of Fruitless Mountain, a young girl named Minli lives in a ramshackle hut with her parents. In the evenings, her father regales her with old folktales of the Jade Dragon and the Old Man on the Moon, who knows the answers to all of life's questions. Inspired by these stories, Minli sets off on an extraordinary journey to find the Old Man on the Moon to ask him how she can change her family's fortune. She

encounters an assorted cast of characters and magical creatures along the way, including a dragon who accompanies her on her quest for the ultimate answer. Grace Lin, author of the beloved *Year of the Dog* and *Year of the Rat* returns with a wondrous story of adventure, faith, and friendship. A fantasy crossed with Chinese folklore, *Where the Mountain Meets the Moon* is a timeless story reminiscent of *The Wizard of Oz* and Kelly Barnhill's *The Girl Who Drank the Moon*. Her beautiful illustrations, printed in full-color, accompany the text throughout. Once again, she has created a charming, engaging book for young readers.

Biology Today is a truly innovative introductory biology text. Embark on an enchanting journey into our country's past hundred years through the remarkable life of Captain Sir Tom Moore THE NO. 1 SUNDAY TIMES BESTSELLER 'A wonderful life story with lessons for us all . . . beautifully written' DAILY TELEGRAPH 'Gloriously enthralling' DAILY MAIL _____ Captain Sir Tom Moore's story is all our stories . . . Born at the tail end of the Spanish flu epidemic, Tom Moore was raised in the Yorkshire Dales by a loving family that had not escaped tragedy. Yet when the clouds of war threatened, Tom raised his hand and joined up to fight. The Second World War took him to the Far East, where his can-do spirit was forged. Whether fighting for his life in Burma or helming a firm back home, racing motorbikes or raising a family, he always sought to do his very best. To make a difference to those around him. Captain Tom's story is that of our parents and our grandparents. It is the story of the past hundred years here in Britain. _____ 'Engaging . . . His upbeat nature shines through and reminds us how much worse this year would have been without him' Evening Standard 'A wonderful read. Captain Tom is a beacon of light, and hope, and positivity' Piers Morgan, Life Stories, ITV 'A great book' Good Morning Britain 'A beautiful book. We have so much to learn from Captain Sir Tom' Chris Evans, Virgin Radio 'Fascinating. It's the life story of an ordinary man who is extraordinary' Michael Ball, BBC Radio 2

If you were God, writing a book you wanted men to understand, would you write it in such a way that men would have to make up meaning in order to understand it, or would you write it in such a way that those that seek to understand could actually come to a knowledge of its truth (Mt 7:7)? The present commentary takes the position that God wrote Revelation such that with sufficient effort and intellectual honesty, readers can understand it. Certainly God uses symbols in Revelation, but when He does, He provides inspired interpretations of the symbols. This commentary seeks to avoid the mistakes of the views that use the symbolical approach to Revelation (preterist, continuous historical, spiritualist, and idealist). These approaches suffer from two basic flaws: assuming the text is symbolical when it is not and making up

meaning regarding the text based on stream of consciousness word association, much as one would do looking at Rorschach inkblots. This commentary seeks to avoid telling God what He should have said and strives to understand what God actually meant. Of all the existing approaches to understanding Revelation, this commentary is most closely aligned with the dispensationalist (premillennialist/Left Behind) view in that it views Revelation from a literalist perspective. It is different from the typical dispensationalist schema in that it views the seven seals as the powers of the Lamb, understands the exercise of the powers of the seven seals to be simultaneous processes, and casts chapters 8-22 as three parallel prophecies of the Lamb's power over the course of the histories of Israel, the nations, and the saints. This commentary also makes use of many of the non-canonical works that provide insight into the spirit world and detail regarding the end of the present age.
