It is not known how silver affects reproduction or pregnancy, but research issued by the National Toxicology Program suggests that silver does not cause cancer. There have been several deaths linked with colloidal silver use, including one case report published in Neurology in which a 71-year-old man died after taking a daily dose of colloidal silver for four months.

The medical uses of silver include its use in wound dressings, creams, and as an antibiotic coating on medical devices. Wound dressings containing silver sulfadiazine or silver nanomaterials may be used on external infections. The limited evidence available shows that silver coatings on endotracheal breathing tubes may reduce the incidence of ventilator-associated pneumonia. There is tentative evidence that using
