Answer 1 of 8: Does anyone know the current law regarding smoking tobacco in Amsterdam? I have heard that new legislation is due but cant find any info doing a web search. Are there any pubs, cafes etc with smoking areas inside or out and are there still smoking...

Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

Issues in Critical and Emergency Medicine / 2013 Edition is a ScholarlyEditions® book that delivers timely, authoritative, and comprehensive information about Injury Research. The editors have built Issues in Critical and Emergency Medicine: 2013 Edition on the vast information databases of ScholarlyNews.® You can expect the information about Injury Research in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. Pediatric Resuscitation is reviewed in this issue of Pediatric Clinics of North America, guest edited by Drs. Steve Schexnayder and Arno Zaritsky. Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why the New Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medical Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions.

An in-depth review by leading authorities of the latest therapies and techniques for rescuing persons in cardiac arrest. The authors explore the physiology behind current state-of-the-art clinical resuscitation and translate it into practical bedside recommendations, clinical tips, and expert techniques. Topics of interest include the epidemiology of sudden death, management of ventilation, chest compression technique training, public access defibrillation, drug delivery during CPR, the latest drug therapies, and cardiac arrest in disease, pregnancy, drowning, lightning strike, and trauma. The authors also review the major ongoing research in resuscitation science that will likely affect the next set of international resuscitation guidelines.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

ABC of Resuscitation is a practical, illustrated guide to the latest resuscitation advice for the non-specialist and provides the core knowledge on the treatment of cardiopulmonary arrest. This edition provides a guide to the European Resuscitation Council Guidelines for Resuscitation 2010 and the Resuscitation Council (UK) 2010 Resuscitation Guidelines. It Includes: the causes and prevention of cardiac arrest basic and advanced life support for adults, children and newborns resuscitation in a range of contexts (in-hospital and out-of-hospital, including drowning, pregnancy, sport and trauma) important aspects of implementation of guidelines including human factors and education ABC of Resuscitation, 6th Edition is ideal for all healthcare professionals including junior doctors, medical students, general practitioners, paramedics and nurses. It is also useful for pre-hospital care practitioners, emergency medicine trainees, resuscitation officers and all those who teach resuscitation. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.
