I find Decoded by Mai Jia a somewhat tricky novel, not because it is closely related to a more conventional spy novel that completely ignores the fundamentals of all other spy novels, in that it doesn't contain violence, money, sex, drugs etc, but because the author often seems to be trapped in the same isolated cryptic universe as his protagonist Rong Jinzhen.

Decoded tells the story of Rong Jinzhen, one of the great code-breakers in the world. A semi-autistic mathematical genius, Jinzhen is recruited to the cryptography department of China's secret services, Unit 701, where he is assigned the task of breaking the elusive 'Code Purple'. Jinzhen rises through the ranks to eventually become China's greatest and most celebrated code-breaker; until he makes a mistake. Then begins his descent through the unfathomable darkness of the world of cryptology into madness. Decoded was an immediate success when it was published in 2002 in China and has become an international bestseller. With the pacing of a literary crime thriller, Mai Jia's masterpiece also combines elements of historical fiction and state espionage. Taking place in the shadowy world of Chinese secret security, where Mai Jia worked for decades, it introduces us to a place that is unfamiliar, intriguing and authentic. And with Rong Jinzhen, it introduces us to a character who is deeply flawed and fragile, yet possessing exceptional intelligence. Decoded is an unforgettable and gripping story of genius, brilliance, insanity and human frailty. Mai Jia (the pseudonym of Jiang Benhu) is arguably the most successful writer in China today. His books are constant bestsellers, with total sales over three million copies. He became the highest paid author in China last year with his new book, Wind Talk. He has achieved unprecedented success with film adaptation: all of his novels are made - or are being made - into major films or TV series, the screenplays of which are often written by Mai Jia himself. He is hailed as the forerunner of Chinese espionage fiction, and has created a unique genre that combines spycraft, code-breaking, crime, human drama, historical fiction, and metafiction. He has won almost every major award in China, including the highest literary honor - the Mao Dun Award.

' Powerful, an entirely original work - a mix of spy thriller, historical saga and mathematical puzzle.' David Evans, Financial Times 'Strange, twisting, often beautiful ... it grips from the first page. An absolute joy.' Economist 'Dreamy, surreal and unexpected. . . possesses an aesthetic of its own, a world in which the characters feel constantly teetering on the edge of obsession.' Tash Aw, Daily Telegraph 'Superb, utterly fascinating.' Edward Wilson,Independent 'Truly a page turner - gripping plot, otherworldly aura and flamboyant detail.' Perry Link, The New York Times Book Review

'Cracking another country's cipher is an undercover fight to the death...' Hidden deep in the mountains, the recruits at 'Unit 701', China's secret services, operate in a dark, shadowy world. There is the 'wind-listener', a blind surveillance officer who can hear sounds from miles away; the beautiful, unstable maths genius who meets a violent end; the old man who deciphers codes in his dreams; the spy who recounts a dangerous mission from beyond the grave. In this story of conspiracies, geniuses, revolutionaries and terrible moral choices, people sacrifice everything for a world of secrets - until, ultimately, it destroys them.

Five code-breakers gather in the mountains of China. Which one is a double agent? A World War Two spy thriller from the most translated Chinese novelist of our time. China, 1941. While war rages in Europe, Japan has established itself as the supreme power in Asia. The beautiful province of Hangzhou has become a stronghold of the Japanese puppet government. One day, five officers from the code-breaking department are escorted to an isolated mansion outside the city. One of them has been sharing secrets with the communists. No-one is leaving until the traitor is uncovered. It should be a straightforward case of sifting truth from lies. But as each code-breaker spins a story that proves their innocence, events are re-framed, and what really happened is called into question again and again. Part revisionist history, part playful meta-fiction, The Message is at once an absorbing and cerebral spy thriller and a commentary on storytelling itself.

Banned in China, this controversial and politically charged novel tells the story of the search for an entire month erased from official Chinese history. Beijing, sometime in the near future: a month has gone missing from official records. No one has any memory of it, and no one could care less—except for a small circle of friends, who will stop at nothing to get to the bottom of the sinister cheerfulness and amnesia that have possessed the Chinese nation. When they kidnap a high-ranking official and force him to reveal all, what they learn—not only about their leaders, but also about their own people—stuns them to the core. It is a message that will astound the world. A kind of Brave New World reflecting the China of our times, The Fat Years is a complex novel of ideas that reveals all too chillingly the machinations of the postmodern totalitarian state, and sets in sharp relief the importance of remembering the past to protect the future.
