Dental Implant Prosthetics | ScienceDirect

A dental implant (also known as an
endosseous implant or fixture) is a surgical

Access Free Dental Implant Prosthetics

component that interfaces with the bone of the jaw or skull to support a dental prosthesis such as a crown, bridge, denture, facial prosthesis or to act as an orthodontic anchor. The basis for modern dental implants is a biologic process called osseointegration, in which materials such as titanium form an intimate ...

Dentures are made of either acrylic (plastic) or metal. A 'complete' or 'full'

Access Free Dental Implant Prosthetics

denture is one which replaces all the natural teeth in either the upper or lower jaws. A 'partial' denture fills in the spaces left by lost or missing teeth. It may be fastened to your natural teeth with metal clasps or 'precision attachments'.
