Designs and Patterns from Muhu Island is such a lovely book! It is satisfyingly large and weighty and explores the needle work traditions from Estonia and Muhu Island in particular. Full of detailed photos of socks, stockings, mittens, gloves, aprons, slippers, blankets, bridal crowns, skirts, belts and much more besides, it is a real gem and I would recommend this book to anyone with an interest in textiles – you won't be disappointed.

Muhu handicraft may truly be considered one of the brightest chapters in the great treasury of Estonian folk art. At all times there have been maidens and women on this small plot of land, overgrown with junipers, who have knitted incredibly fine-textured mittens and socks; they have been fond of wild color combinations, embroidered floral beauty and rather sharp-tongued humor.

This is an advanced and complex Fair Isle knitting pattern for a hat. It contains 7 pages of written instructions and charts. It is knit in the round and made out of ten colors. It might also be a great project to use up small amounts of yarn in your stash. It is inspired by the wonderful book 'Designs and Patterns from Muhu Island'.

Design Roots provides a comprehensive review of culturally significant designs, products and practices which are rooted to particular communities through making tradition and a sense of place. Many rich traditional practices associated with community, tacit knowledge and culture are being rapidly lost due to globalisation and urbanisation. Yet they have much to offer for the future in terms of sustainability, identity, wellbeing and new opportunities in design. This book considers the creative roots, the place-based ecologies, and deep understandings of cultural significance, not only in terms of history and tradition but also in terms of locale, social interactions, innovation, and change for the sustainment of culturally significant material productions. Importantly, these are not locked in time by sentimentality and nostalgia but are evolving, innovative, and adaptive to new technologies and changing circumstances. Contributing authors explore the historical roots of culturally significant designs, products and practices, emerging directions, amateur endeavours, enterprise models, business opportunities and the changing role and contribution of design in the creation of material cultures of significance, meaning and value. An international perspective is provided through case studies and research from North and South America, Africa, Europe, Asia and Australasia, with examples including Aran jumper production in Northern Ireland, weaving in Thailand, Iranian housing design, Brazilian street design and digital crafting in the United Kingdom.

"Solveig Hisdal is not only aware of the knowledge housed in Norway's museums, she has also learned how to use it. She has visited museums throughout the country, searching eagerly for the treasures that her ancestors left behind. She has found textiles, chests, cabinets and old folk costumes that have later become her greatest source of inspiration. This book is a result of her quest, and it shows how the creativity of the past has inspired her to make beautiful knitted designs. It contains wonderful knitting ideas for almost all occasions, from a child's christening outfit to an exquisite, knitted bridal cardigan with beads and silk. Whether you wish to be inspired by the beautiful pictures, or knit some of the outfits -- enjoy the book!"--P. [4] of cover.

A dynamic resurgence in sewing and knitting is under way, with many people enjoying making and mending their own garments at home. However, stories abound of homemade clothes languishing at the back of the wardrobe. Amy Twigger Holroyd draws on ideas of fashion, culture and craft to explore makers' lived experiences of creating and wearing homemade clothes in a society dominated by shop-bought garments. Using the innovative metaphor of fashion as common land, Folk Fashion investigates the complex relationship between making, well-being and sustainability. Twigger Holroyd combines her own experience as a designer and knitter with first-hand accounts from folk fashion makers to explore this fascinating, yet under-examined, area of contemporary fashion culture. Looking to the future, she also considers how sewers and knitters might maximise the radical potential of their activities.
