Electrical Power Engineering.
Power electric modules. This
laboratory is focused on the topic
of the generation, the distribution
and the utilization of the electrical
energy, used for both industry and
domestic applications. The trainer
is composed of a set of modules
for the simulation of the various
subsystems forming a complete
electrical power system, from
power generation to energy
utilization.

The book provides a clear, systematic and exhaustive exposition of various aspects of Generation Distribution and Utilization of Electrical Energy. The modern distribution network is spread over a large geographical area and hence the concept of distribution automation has been discussed so as to operate the system with a higher index of reliability and more economically.
