The last twenty years have seen an unprecedented rise in the use of secret courts or 'closed material proceedings' largely brought about in response to the need to protect intelligence sources in the fight against terrorism. This has called into question the commitment of legal systems to long-cherished principles of adversarial justice and due process. Foremost among the measures designed to minimise the prejudice caused to parties who have been excluded from such proceedings has been the use of 'special advocates' who are given access to sensitive national security material and can make representations to the court on behalf of excluded parties. Special advocates are now deployed across a range of administrative, civil and criminal proceedings in many common law jurisdictions including the UK, Canada, New Zealand, Hong Kong and Australia. This book analyses the professional services special advocates offer across a range of different types of closed proceedings. Drawing on extensive interviews with special advocates and with lawyers and judges who have worked with them, the book examines the manner in which special advocates are appointed and supported, how their position differs from that of ordinary counsel within the adversarial system, and the challenges they face in the work that they do. Comparisons are made between different special advocate systems and with other models of security-cleared counsel, including that used in the United States, to consider what changes might be made to strengthen their adversarial role in closed proceedings. In making an assessment of the future of special advocacy, the book argues that there is a need to reconceptualise the unique role that special advocates play in the administration of justice.

The implications of European integration for national democracy and constitutionalism are well known. Nevertheless, as the events of the last decade made clear, the EU's complex system of governance has been unable to achieve a democratic or constitutional legitimacy in its own right. In *Power and Legitimacy: Reconciling Europe and the Nation-State*, Peter L. Lindseth traces the roots of this paradox to integration's dependence on the postwar constitutional settlement of administrative governance on the national level. Supranational policymaking has relied on various forms of oversight from national constitutional bodies, following models that were first developed in the administrative state and then translated into the European context. These national oversight mechanisms (executive, legislative, and judicial) have over the last half-century developed to address the central disconnect in the integration process: between the need for supranational regulatory power, on the one hand, and the persistence of national constitutional legitimacy, on the other. In defining the ways European public law has sought to reconcile these two conflicting demands, Professor Lindseth lays the foundation for a better understanding of the "administrative, not constitutional" nature of European governance going forward.

Ethics for the Information Age is appropriate for any standalone Computers and Society or Computer Ethics course offered by a computer science, business, or philosophy department, as well as special modules in any advanced CS course. It is also appropriate for readers interested in computers and society or computer ethics. In an era where information technology changes constantly, a thoughtful response to these rapid changes requires a basic understanding of IT history, an awareness of current issues, and a familiarity with ethics. *Ethics for the Information Age* is unique in its balanced coverage of ethical theories used to analyze problems encountered by computer professionals in today's environment. By presenting provocative issues such as social networking, government surveillance, and intellectual property from all points of view, this market-leading text challenges students to think critically and draw their own conclusions, which ultimately prepares them to become responsible, ethical users of future technologies.

• **Teaching and Learning Experience** This program presents a better teaching and learning experience—for you and your students. It will help:

- **Encourage Critical Thinking:** A balanced, impartial approach to ethical issues avoids biased arguments, encouraging students to consider and analyze issues for themselves.
- **Keep Your Course Current and Relevant:** A thoughtful response to information technology requires an awareness of current information-technology-related issues.
- **Support Learning:** Resources are available to expand on the topics presented in the text.

Developed from celebrated Harvard statistics lectures, *Introduction to Probability* provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional

From fundamental concepts to cutting-edge applications, this is the first encyclopaedic reference of important terms and effects in optoelectronics and photonics. It contains broad coverage of terms and concepts from materials to optical devices and communications systems. Self-contained descriptions of common tools and phenomena are provided for undergraduate and graduate students, scientists, engineers and technicians in industry and laboratories. The book strikes a balance between materials and devices related coverage and systems level terms, and captures key nomenclature used in the field. Equations are used where necessary, and lengthy derivations are avoided. Over 600 clear and self-explanatory illustrations are used to help convey key concepts, and enable readers to quickly grasp important concepts.

In late 2005 Turkey began accession talks with the European Union. It now seems that some EU member states consider Turkish accession inherently undesirable. The Committee strongly supports the United Kingdom Government's position that Turkey's accession to the EU offers potential benefits for both sides. This not to underplay the difficulties and obstacles. The Irish "No" vote in the referendum on the Lisbon Treaty has led some European leaders to say there can be no enlargement without institutional reform. Turkey itself has faced severe political and constitutional difficulties this year. The country has a relatively large economy, but GDP per capita still remains low and inflation high by developed country standards. Political and social reforms will be necessary. Migration from Turkey will need to be carefully managed. The conflict over Cyprus also has to be resolved. The Committee's fear is that the negative signals recently sent out by some EU member states will reduce the political will to negotiate. Suspending or frustrating the accession negotiations will signal to a moderate, democratic, secular state that it can never be part of Europe. Whatever the reasons given for any suspension, the belief in Turkey would be likely to be that the country could not join purely because the majority of its population is Muslim. That is not a signal the Committee believes should be given. Turkey is a large economy, in a key strategic position, with high growth rates, a young population (compared with current EU member states) and sizeable investment flows. Turkey needs to be reassured that, if it demonstrates its commitment to negotiation and reform, that commitment will be fully matched by the EU and that the door to membership remains wide open.

Author and subject index to a selected list of periodicals not included in the Readers' guide, and to composite books.

Hungry? Need Lunch? Mum's packed you curried banana and pickle sandwiches again? Only got a \$1.25 to your name? Then you need to see Matt, because Matt has an amazing talent . . . Some kids are good at footy, or handball, or tennis. Not Matt, though. Matt is an expert at Tuckshop. (\$1.25 = sausage roll and small choc milk, by the way . . .) In the dog-eat-pie world of the playground, when your best friend is the lunch lady, and hunger can be just around the corner, someone like Matt can go a long way. But of course, being the best at anything does have its problems. Even tuckshop.
