This engaging guide introduces readers to the rules of color magic and the natural influences of color that can be harnessed to bring about change and improvements in any area of life. Color has a profound effect on our attitudes and emotions. We even us color in our everyday speech—we're green with envy, see red when we're angry, and are blue when we're lonely. Scientific studies have discovered how certain colors influence mood, how quickly patients recover from illness, or how well students learn. Zolar's Magick of Color reveals the secrets of color and explains how to use its energy to make positive changes—to get a new job, get a raise, or develop a new romance. Zolar details a variety of ways to access the transformative properties of color, including wearing clothes of a particular color, surrounding yourself with that color, or burning a colored candle in a ceremony. Zolar explains each color's unique properties and gifts.

Forbidden Knowledge explores the censorship of medical books from their proliferation in print through the prohibitions placed on them during the Counter-Reformation. How and why did books banned in Italy in the sixteenth century end up back on library shelves in the seventeenth? Historian Hannah Marcus uncovers how early modern physicians evaluated the utility of banned books and facilitated their continued circulation in conversation with Catholic authorities. Through extensive archival research, Marcus highlights how talk of scientific utility, once thought to have begun during the Scientific Revolution, in fact began earlier, emerging from ecclesiastical censorship and the desire to continue to use banned medical books. What's more, this censorship in medicine, which preceded the Copernican debate in astronomy by sixty years, has had a lasting impact on how we talk about new and controversial developments in scientific knowledge. Beautiful illustrations accompany this masterful, timely book about the interplay between efforts at intellectual control and the utility of knowledge.

* Stage a coup * Swim with sharks * Beat a breathalyzer * The Forbidden Knowledge series has taken readers over the edge before, but never like this. The Most Forbidden Knowledge jam-packs the best and baddest how-tos into one car-stealing, keg-kicking, base-jumping-off-a-skyscraper collection. You'll find everything you ever wanted to learn (though probably never should) in this ultimate self-destruction manual.

This book covers a number of different topics, including Black Magic, lucky numbers and insight into dreams. Instructions are provided on how to be a spirit medium and hypnotize, among other things. It's easy to read and is as informative as it is entertaining.

The completely revised and updated edition of the classic, best-selling guide to dream interpretation In the first major revision of the encyclopedia that has sold half a million copies worldwide, Zolar, the acclaimed "Dean of Astrology" (The New Yorker), has created the indispensable bedside reference for today's dreamers, reflecting the changes that have affected our waking hours and inevitably influence the content and significance of the messages we receive while we sleep. Looking at new cultural trends, work and social patterns, technologies and means of communication, Zolar reveals the meanings of dreams about cell phones, computers, cyberspace, beepers and much more. His concise and incisive explanations of such classic dreams as meeting a redheaded stranger, flying without wings and trying to comfort a crying baby are here as well, while obsolete subjects -- like girdles, gleaners and grenadiers -- have been eliminated. To complement each dream category a lucky number has been added for this new edition. With interpretations for more than 20,000 dreams, Zolar's Encyclopedia and Dictionary of Dreams offers you the opportunity to uncover the secrets hidden in your dreams and to act on the wisdom -- or respond to the warnings -- they contain.

The author, a former NASA aeronautical engineer, shares his own "out-of-body" experiences and argues that science has much to learn from this phenomenon. Reprint.
