How did the kings of England and France govern their kingdoms? This volume, the product of a ten-year international project, brings together specialists in late medieval England and France to explore the multiple mechanisms by which monarchs exercised their power in the final centuries of the Middle Ages. Collaborative chapters, mostly co-written by experts in each kingdom, cover topics ranging from courts, military networks and public finance; office, justice and the men of the church; to political representation, petitioning, cultural conceptions of political society; and the role of those excluded from formal involvement in politics. The result is a richly detailed and innovative comparison of the nature of government and political life, seen from the point of view of how the king ruled his kingdom, but bringing to bear the methods of social, cultural and economic history to understand the underlying armature of royal power.

This book explores the politics of local economic development in Northern England. Socio-economic conditions in the North - and its future prospects - have become central to national debates in the UK. The status of Northern regions and their local economies is intimately associated with efforts to 'rebalance' the economy away from the South East, London and the finance sector in the wake of the 2008 financial crisis. The contributors to this volume focus in particular on the coalition and Conservative governments' 'Northern Powerhouse' agenda. They also analyse associated efforts to devolve power to local authorities across England, which promise to bring both greater prosperity and autonomy to the deindustrialized North. Several chapters critically interrogate these initiatives, and their ambitions, by placing them within their wider historical, geographical, institutional and ideological contexts. As such, Berry and Giovannini seek to locate Northern England within a broader understanding of the political dimension of economic development, and outline a series of ideas for enhancing the North's prospects.

Based on fine-grained ethnographic research in an English city, this book offers a highly original perspective on England's contemporary political predicament. It argues that some of the most influential academic accounts of the country's current political situation, particularly those focusing on culture or racism, have neglected the key role of nationalism as an often

unspoken, banal political principle and framing ideology. Suggesting that economic inequalities remain the key causal ingredient of English political life and, crucially, that these are being interpreted by individuals in relation to a nationalist/cosmopolitan ideological axis, the author argues that any effective, progressive political future will require a reinvigorated sense of political community. Proposing a politics that will promote both nationhood and cosmopolitanism, *Nationalism, Inequality and England's Political Predicament* advocates a seemingly contradictory but necessary approach by which explicitly anti-nationalist and anti-racist principles coexist expediently alongside short-term protectionist and immigration control policies.

*A Political History of Tudor and Stuart England* draws together a fascinating selection of sources to illuminate this turbulent era of English history. From the bloody overthrow of Richard III in 1485, to the creation of a worldwide imperial state under Queen Anne, these sources illustrate England's difficult transition from the medieval to the modern. Covering a period characterised by conflict and division, this wide-ranging single-volume collection presents the accounts of Yorkists and Lancastrians, Protestants and Catholics, and Roundheads and Cavaliers side by side. *A Political History of Tudor and Stuart England* provides a crucial opportunity for students to examine the institutions and events that moulded English history in the early modern era at first-hand.

How England's political cultures are being eroded by neoliberalism

An exploration of how power and political society were imagined, represented and reflected on in medieval English art

In recent years new schools of historiography and criticism have recast the political and cultural histories of Elizabethan and early Stuart England. However, for all the benefits of their insights, most revisionist historians have too narrowly focussed on high politics to the neglect of values and ideology, and New Historicist literary scholars have displayed an insufficient grasp of chronology and historical context. The contributors to this pioneering volume, richly fusing these approaches, apply a revisionist close attention to moments to the wide range of texts - verbal and visual - that critics have begun to read as representations of power and politics. Excitingly broadening the range of areas and evidence for the study of politics, these outstanding essays demonstrate how the study of high culture - classical translations, court portraits royal palaces, the conduct of chivalric ceremony - and low culture - cheap pamphlets and scurrilous verses - enable us to reconstruct the languages through which contemporaries interpreted their political environment.

This book explores the Bible as a political document in seventeenth-century England, revealing how it provided a key language of political debate.

First published in 1925. This book is a brief analysis of the historical relation of contemporary writers to their immediate predecessors. Among those whose work is examined are Ramsay MacDonald, Bertrand Russell, Harold Laski, the Pauls, Hobhouse, Bryce, G. D. H. Cole, Norman Angell, etc. This title will be of great interest to students of politics, philosophy and history.
