Fetal Pig Dissection 5 Diaphragm Fibrous pericardium Thymus FIGURE F1.1bThymus gland in the fetal pig. 5. The female gonads are called ovaries and are very small,oval organs located posterior to the kidneys. 6. The male gonads,the testes, are located outside of the abdominopelvic cavity in the scrotum. Because these pigs are fetal,the scrotum ...

FETAL PIG DISSECTION A LABORATORY GUIDE

Although the size of the fetus pig is smaller than that of the human body the organization of the major organs and the functions of such organs are still the same. This pig dissection is designed to visually show students the different systems inside a pig and, indirectly, their own bodies. Upon dissection they see the heart, the major organ in the circulatory system that pumps the oxygenated blood around the body; the lungs, the major organ in the respiratory system that provides oxygen to ...

Fetal Pig Dissection Lab Answers | SchoolWorkHelper

The fetal pig that you will dissect has been injected with a colored latex (rubber) compound. The arteries have been filled with red latex and the veins with blue. An incision was made on the side of the neck to enable the injections. The incision can be seen in the first photograph below.

Reading: Fetal Pig Dissection | Biology II Laboratory Manual

File Type PDF Fetal Pig Dissection Post Lab Questions Answerssurface of the heart are the coronary arteries and veins. A characteristic feature of the fetal mammalian heart is the ductus arteriosus. This short vessel allows blood to bypass pulmonary circulation until birth, at which time there is a complete closure of the vessel.
