diesel engines. 5W-30 and 5W-40 oils are compatible with some models of common cars, like the Ford Focus, Ford Ka, Honda Civic and VW Golf.

Which oil does my car need? Find the right viscosity | The AA
The Ford 5.4 Triton V8 is a part of Ford's Modular V8 engine family, a 5.4-liter naturally aspirated eight-cylinder gasoline engine, which was first introduced in the 1997 Ford F150. The 5.4 engine basically is a stroked version of the 4.6-liter version since the architecture of both engines is very similar. During the production history, there were three versions of 5.4L engine: 5.4 SOHC V8 with 2-valve heads or 3-valve heads, and more powerful, 5.4L DOHC 4-valve V8. 2- and 3-valve engines ...

The C5 category that has been newly introduced in the ACEA 2016 sequences has even lower limit for HTHS viscosity. In order for an oil to meet this specification it must be a mid-SAPS oil and its HTHS viscosity has to be between 2.6 and 2.9 mPa*s. In case of the E class the SAPS content and the drain interval make the difference.

biobased lubricants, Environmentally Friendly and Biobased Lubricants highlights the development of environmentally friendly additives that are compatible with environmental regulations and describes the approaches being used in this emerging area. Derived from research topics shared over the years at various technical sessions of the Society of Tribologists and Lubrication Engineers (STLE) Annual Meetings, the book includes a critical assessment of gaps and weaknesses in the field of environmentally friendly fluids and biobased lubricants. Each chapter is written by authors selected from the environmentally friendly fluids and biobased lubricants sessions of STLE and also incorporates input from prominent researchers invited to take part in the book. Expert contributors discuss the control, production, usage, and disposal of lubricants; factor in related policies, laws, and regulations around the world;

and include case studies demonstrating the uses and values of commercially viable biobased lubricants. The book is divided into five sections that cover advanced environmentally friendly base oils and feedstocks, biobased hydraulic lubricants and biodegradability, chemically/enzymatically modified environmentally friendly base oils, vegetable oil-based environmentally friendly fluids, and additives for environmentally friendly fluids.

The automotive lubricants arena has undergone significant changes since the first edition of this book was published in 1996.

Environmental concerns, particularly regarding improvement of air quality have been important in recent years, Reduced emissions are directly related to changes in lubricant specifications and quality, and the second edition of the Automotive Lubricants Reference Book reflects the urgency of such matters by including updated and expanded detail. This second edition also considers the recent phenomenon of increased consolidation within the oil and petroleum additive arenas, which has resulted in fewer people for research, development, and implementation, along with fewer competing companies. After reviewing the first edition the authors have fully reviewed and updated the information to fit in with the changes in technology and markets. Chapters include Introduction and Fundamentals Constituents of Modern Lubricants Crankcase Oil Testing Crankcase Oil Quality Levels and Formulations
