of working with Mediterranean-region plants for more than 30 years. The first part of the book examines the behavior of plants that face drought in their natural habitat. What is drought and how do plants manage to survive when little water is available? The second part is concerned with gardening techniques in a dry climate. How do you prepare the soil, when do you plant, and how do you maintain a dry garden? The third and longest part describes in detail no less than 500 rewarding plants that are well-adapted to dry gardens, each classified by a unique dry resistance code. The Dry Gardening Handbook is essential reading for gardeners who live in one of the world's Mediterranean climate zones and will also be of interest to gardeners
