Master's Electronics and Communication Engineering ESE Topicwise Objective Solved Paper-II gives detailed solutions for the past 29 years ESE question papers. Unlike other ESE solution books published by some of the leading institutes/publishers, the solution books from IES Master offer topicwise solutions with explanations. The emphasis is clearly on the understanding of concepts and building upon a holistic picture. So as you finish a topic, say Controllers and Compensators, you will find all the previous years' question papers with detailed explanation under that particular topic.

Computer science is a discipline that extends theory and practice. It needs thinking both in abstract terms and in concrete terms. The practical side of computing can be seen everywhere. Computer science also has strong connections to other disciplines. Many problems in science, engineering, health care, business and other areas can be solved efficiently with computers, but finding a solution requires both computer science expertise and knowledge of particular application domain. Computer science has a wide range of spheres. These embrace computer architecture, software systems, graphics, artificial

intelligence, computational science and software engineering. Drawing from a common core of computer science knowledge, each speciality area emphasizes on particular challenges. A Handbook on Computer Science encompasses all the formulae and important theoretical aspects of computer science, with appropriate diagrams, whenever it is appropriate. An extensive coverage of key points for additional information is also given. This handbook covers all essential concepts and terms in computer science.
