Later today (June 18, 2015), the 2014 edition of the Journal Citation Report (JCR) will be released, listing citation performance metrics for 11,149 journals. While the JCR calculates many different citation-based metrics, most editors and publishers will be chiefly interested in just one single metric—the Journal Impact Factor (JIF). The JIF measures, for any given year, the citation performance of journal articles in their second and third year of publication.

The Article Influence Score
is calculated by dividing
the Eigenfactor Score by the
number of articles published
in the journal over a five
year period, and normalizing
the scores against the
volume of articles published
by other JCR journals over a
five year period such that
the average score is 1.

June 2015 The Journal
Citation Reports 2015®
(JCR), recently released by
Thomson Reuters, lists a
total of 1,595 Springer
journals, with 37 Springer
journals joining the list
for the first time.
Significantly, in 2014, 82
percent of the Springer
journals in the list were
cited more frequently than
in the previous year.
