COST ESTIMATION - University of Oklahoma

shall and Swift (M&S; formerly Mar-shall and Stevens) Equipment Cost Index was started as a regular feature of CE [4]. We suspect that Arnold and Chilton derived the productivity fac-tor from this data, but theydid not leave a paper trail. Despite the fact that the M&S index is based on used-equipment prices, while the CEPCI is built around new

Engineering Practice Updating the Plant Cost Index

A cost index shows the change in cost over a span of time. The index will always have a date for the base figure of 100. The numbers in the table can be thought of as percentages representing how the cost has risen or fallen when compared to the base. So if the index indicates that 2007 is the base (i.e., 100) and for 2013 the index is "134", then the 2013 cost was 34% higher than the base point.
