Inner Rings - Inch and

Download Free Metric Needle

Metric Inner rings are made from hardened rolling bearing steel and have precision ground or machined raceways. Ideal applications for using inner rings include:

When in order to allow larger axial displacements of the shaft in relation to the housing, needle roller bearings must be combined with wider inner rings.

Needle roller bearings are rotational motion

bearings in which a thin needle-shaped roller is incorporated into a

rolling element. They have a low cross-section height and high load

capacity compared with ball bearings. Being small, needle roller bearings

Bearing King Ltd

The very small diameter deviation of the rollers within one assembly enables these bearings to accommodate heavy axial loads and peak loads. Extended bearing service life To prevent stress peaks, the roller ends are relieved slightly to modify the line contact between the raceway and rollers.
