Department of Microbiology & Infection Control

Infection prevention is the discipline concerned with preventing nosocomial or healthcare-associated infection (HAI). Technology advances in medicine in the treatment of patients has led to many of these infections. Using a forensic approach and in accordance with guidelines published by the Centers for Disease Control and Prevention (CDC)

Infection Control - Microbiology Specialists Inc.

Infection is the presence of microorganisms causing damage to body tissues, usually in the presence of acute inflammation (pain, swelling, redness, heat and loss of function). For example *Staphylococcus aureus* on intact skin does not cause a problem; it is the normal flora for skin. However if you cut your skin, *Staphylococcus aureus* can cause infection in the cut with associated inflammation ...
