Mild Steel Coach Bolts & Nuts - Coach Bolts & Nuts ...  
Hex Bolts - Metric. A hexagon bolt, or hex bolt to give it its more common name, is a threaded bolt with a plain shank and hexagon shaped head. Metric is the most common thread type in production today. Usually specified as M then a number x another number. This signifies the thread diameter and the length of the fastener.

Metric Hex Bolts | Bolts  
A wide variety of mild steel hexagonal bolts options are available to you, such as din, gb, and iso. You can also choose from automotive industry, heavy industry, and mining mild steel hexagonal bolts, as well as from stainless steel, steel mild steel hexagonal bolts, and whether mild steel hexagonal bolts is zinc, black, or plain.

mild steel hexagonal bolts, mild steel hexagonal bolts ...  
The following table of the weights of mild-steel bolts and nuts may be found useful in the process of estimating weights of steel-work and fastenings.. The heads and nuts are hexagonal, of the usual Whitworth standard size; that is, the depth of the head is seven-eighths of the diameter of the bolt, and the depth of the nut is equal to the diameter.

Weights Of Mild Steel Bolts And Nuts  
Mild Steel Hex Bolts and Nuts. Mild Steel Bolts & Nuts: These are stocked as complete units, also known as XOX. They are only available in metric thread and are stocked in M6 – M30 diameters in all the popular lengths. They are priced in Kg’s, conversions from units available on request, and the thread lengths are 2d + 6mm up to 125mm long and 2d + 12mm for the longer length bolts.

The DIN 6721 flange bolt is a hexagon headed bolt or screw incorporating a flange, negating the need for a washer. Flange bolts are a more attractive alternative to their DIN 931 and DIN 933 hex driven counterparts. Typically used where The flange offers protection for the bolted component where the driving tool may otherwise scratch its surface.

Bolts and Machine Screws - Metric - Westfield Fasteners Ltd  
Hexagonal Head Screw. Mild steel fasteners are widely used for all general purposes where high strength and corrosion resistance is not required. Their low cost makes them ideal for everyday use. Mild steel Bolts and Screws conform to grades 4.6 and 4.8 and Nuts to grade 4. Higher grades of 5.6 and 5 are also arranged against order.

Mild Steel, Structural, Coach and Hexagon Bolts - Ullrich ...  
Our stocks of stainless steel bolts have a partial thread and a hexagon head. Produced from grade 304 stainless steel, these bolts have good corrosion resistance and are available in M5 through to M20 diameter. 304 stainless is often referred to as A2 or 18/8 steel (18% chromium / 8% nickel). The chromium content provides the steel with high hardness properties and very good dimensional stability combined with good resistance to wear and tear.
