Pediatric Enteral Nutrition - NASPGHAN

Enteral nutrition avoids the need for central venous access, thus diminishing infections and eliminating the thrombotic and hepatic complications of parenteral nutrition. Malnourished children unable to maintain adequate nutrition can benefit from enteral feeding.

Enteral Feeding | American Academy of Pediatrics

The Guidelines for the Provision and Assessment of Nutrition Support Therapy in the Pediatric Critically Ill Patient, collaboratively developed by the Society of Critical Care Medicine (SCCM) and American Society for Parenteral and Enteral Nutrition (ASPEN), are intended to supplement and enhance clinicians' knowledge of best practices for nutrition support in critically ill children. 7

Incorporating the latest pediatric nutrition support ...

INTRODUCTION. Enteral nutrition is defined as providing nutrients via the gastrointestinal tract. Although the term technically refers to nutrition given either by mouth or through a feeding tube, in common usage, the term usually refers to tube feeding and includes feeding via nasogastric tube, gastrostomy tube, gastro-jejunostomy tube, or jejunostomy tube.

Overview of enteral nutrition in infants and children ...

This document represents the first collaboration between 2 organizations-the American Society for Parenteral and Enteral Nutrition and the Society of Critical Care Medicine-to describe best practices in nutrition therapy in critically ill children. The target of these guidelines is intended to be the pediatric critically ill patient (>1 month and <18 years) expected to require a length of stay >2-3 days in a PICU admitting medical, surgical, and cardiac patients.

Guidelines for the Provision and Assessment of Nutrition ...

These Guidelines for Paediatric Parenteral Nutrition have been developed as a mutual project of the European Society for Paediatric Gastroenterology, Hepatology and Nutrition (ESPGHAN; www.espghan.org) and the European Society for Clinical Nutrition and Metabolism (ESPEN; www.espen.org). The guidelines are addressed primarily to professionals involved in supplying and prescribing parenteral nutrition (PN) to infants, children and adolescents.
