This book is to help foreign medical doctors who immigrate to the US legally to return to practice medicine via medical licensing. It explains in very details all the steps and important issues to help foreign medical doctors to start their saga of medical licensing on their own with DIY- Do It Yourself fashion. Furthermore, I explain the extraordinary work that USFMDs (US citizen foreign Medical Doctors) have to go through this tough process of medical licensing; they have paid very high prices to earn the ECFMG certificate. However, they are currently terribly mistreated. The book reveals the true painful story how USFMDs have been buried alive for the last six decades. USFMDs, especially the ones who graduated and left medical schools over three or more years are of terribly unjust and unable to return to practice medicine even they proved their qualifications and capability to be great physicians for the American public. This is the true story that should be told to every American.
