Poverty in South Korea has been in drastic decline since the mid-20th century, particularly the absolute poverty rate. Relative poverty was also in decline until the late 1990s, but has risen since then. While only about 2% of South Koreans are affected by absolute poverty today, about 14-15% of these 2% are elderly and are affected by relative poverty.

Poverty in South Korea - Wikipedia
Korean food has countless health benefits and has been used for centuries to keep the body in balance. Food and medicine are usually considered as one and the same thing. The idea that health starts with food means that medical treatment should be tried if any effect is not seen after trying to treat all diseases first with food. In order to help balance the body energies, there are five ...
