This is a methods book for preservice middle level majors and beginning middle school teachers. It takes a very practical approach to learning to teach middle school mathematics in an emerging Age of the Common Core State Standards. The Common Core State Standards in Mathematics (CCSSM) is not meant to be " the " official mathematics curriculum; it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace. A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and (traditional pathway) Algebra I portions of the CCSSM first, with issues in content-practice assessment, learning, teaching, and classroom management pursued next and in that order. In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content-practice learning, teaching, and assessment. The Common Core state content standards, which pertain to mathematical knowledge, skills, and applications, have been carefully crafted so that they are teachable, learnable, coherent, fewer, clearer, and higher. The practice standards, which refer to institutionally valued mathematical actions, processes, and habits, have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation. Thus, in the CCSSM, proficiency in content alone is not sufficient, and so does practice without content, which is limited. Content and practice are both equally important and, thus, must come together in teaching, learning, and assessment in order to support authentic mathematical understanding. This blended multisourced text is a " getting smart " book. It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond, including future careers.

American Indian Stories (1921) is a collection of stories and essays from Yankton Dakota writer Zitk á la- Š á . Published while Zitk á la- Š á was at the height of her career as an artist and activist, American Indian Stories collects the author ' s personal experiences, the legends and stories passed down through Sioux oral tradition, and her own reflections on the mistreatment of American Indians nationwide. In " My Mother, " Zitk á la- Š á remembers the walk she would take with her mother to the river, where they would gather water to use in their wigwam. This simple chore becomes a cherished tradition between the two, allowing Zitk á la- Š á ' s mother to educate her on the circumstances that led their people to the reservation, depriving them of land and life itself. " The Legends " traces Zitk á la- Š á ' s childhood experience of learning from the oral tradition passed down from the Dakota elders. In " The Coffee Making, " she remembers the first time she made coffee. While her mother has gone out for the day, an elder pays a visit to their wigwam. Remembering that her mother usually makes coffee for visitors, Zitk á la- Š á attempts to play hostess to her visitor, who humors her and takes the time to share stories about his life and their people. American Indian Stories is a charming and politically conscious collection of stories from one of the leading American Indian writers of her generation, a committed activist and true voice for change who saw through her own eyes the lives and experiences of countless others. With a beautifully designed cover and professionally typeset manuscript, this edition of Zitk á la- Š á ' s American Indian Stories is a classic of American Indian literature reimaged for modern readers.
