investments in
software and
each software

a valid licence.

Each one of us
is affected by
licences since
we use at least
one software as
part of Business

customer.

However, not much effort is put to manage

these assets efficiently.

This book serves two major

objectives.

Foremost, it tries to

understand, "Why is it imperative to focus on

management"?

Secondly, it
traces the key

steps of the

journey in
implementing a

robust framework

based on actual

case studies in

different

organisations.

It will help you

understand the

importance of software licence management and provide concise guidelines to implement a framework that is apt for your organisation. It will also help you realise that software assets are no longer liabilities once
