Linear Algebra Applications

Hence this is a solution for every value of s and t . 2. b. The equation is $2x+3y = 1$. If $x = s$ then $y = \frac{1-2s}{3}$ so this is one form of the general solution. Also, if $y = t$ then $x = \frac{1-3t}{2}$ gives another form. 4. Given the equation $4x+2y+0z = 1$, take $y = s$ and $z = t$ and solve for x : $x = \frac{1-2s}{4}$. This is the general solution. 5. a.

Applications by W. Keith Nicholson, traditionally published for many years is now being released as an open educational resource and part of Lyryx with Open Texts! Supporting today's students and instructors requires much more than a textbook, which is why Dr. Nicholson opted to work with Lyryx Learning. Overall, the aim of the textbook is to achieve a balance among computational skills, theory, and applications of linear algebra.
