Perhaps not surprisingly, steampunk lends itself well to Lego building blocks, as

evidenced by Guy Humber ' s new Steampunk Lego collection. This delightful Everybody loves steampunk! On the off chance you ' re unfamiliar with the term, steampunk is essentially an alternate 19th century, a blend of fantasy, sci-fi, and historical adventure, rife with steam power and clockwork mechanisms.

After creating my LED Lego Octopus, I decided to put a SteamPunk theme on my next one. This Lego Octopus is similar to my last one but I was able to streamline the wiring process a bit. I also added Lego Technic gears and 18k gold paint to give it the SteamPunk aesthetic. I used orange LED lights this time instead of the RGB LEDs.

Filled with dirigibles and floating cities, penny-farthings and pirate ships, curiosities and robots galore, Steampunk LEGO is an illustrated collection of Victorian-era sci-fi treasures, all built from LEGO. Curated by award-winning LEGO builder and special effects master Guy Humber, this full-color coffee table book showcases an eclectic variety of models designed by dozens of the world ' s best LEGO artists. Grab your brass goggles and join fictional explorer Sir Herbert Jobson as he travels the world cataloguing its technological wonders for Queen Victoria. His entertaining

descriptions of an imaginative alternate history bring these delightful LEGO models to swashbuckling life.

This inspiring tour is filled with bright visuals, step-by-step breakdowns of 25 models, and nearly 200 example models from the world's best builders. Learn to build robots, trains, medieval villages, spaceships, airplanes, and much more. Whether you're brand-new to LEGO or have been building for years, this book is sure to spark your imagination and motivate you to keep creating!

Step-by-step instructions show how to build detailed LEGO models of neighborhoods - complete with homes, stores, restaurants, barbershops, and more. Enter the fantastical world of model building. The LEGO Neighborhood Book 2 is a full-color guide to creating intricate, bustling LEGO neighborhoods, and cities. In this second volume, a follow up to the runaway best-selling first volume, you'll learn even more ways to create classic architectural styles using only LEGO bricks. In addition to creating entire buildings, LEGO model-building experts Brian and Jason Lyles also show you how to create interesting architectural features like cornices, false fronts, porches, and detailed interiors and furniture. With instructions for three buildings and many smaller builds, The LEGO Neighborhood Book 2 is sure to provide hours of building fun and inspiration for readers of all ages.

LEGO Micro Cities is a full colour guide to creating intricate LEGO micro cities. Readers learn how to recreate classic architectural styles using only LEGO bricks. In addition to creating entire buildings, LEGO model-building expert Jeff Friesen shows how to create interesting architectural features like bridges and skyscrapers, and will offer suggestions on how to customise your cities and make the models your own.

Steampunk, the retro-futuristic cultural movement, has become a substantial and permanent genre in the worlds of fantasy and science fiction. A large part of its appeal is that, at its core, Steampunk is about doing it yourself: building on the past while also innovating and creating something original. VanderMeer's latest book offers practical and inspirational guidance for readers to find their individual path into this realm. Including sections on art, fashion, architecture, crafts, music, performance, and storytelling, The Steampunk User's Manual provides a conceptual how-to guide that motivates and awes both the armchair enthusiast and the committed creator. Examples range from the utterly doable to the completely over-

the-top, encouraging participation and imagination at all levels.

Since the "Automatic Binding Bricks" that LEGO produced in 1949, and the LEGO "System of Play" that began with the release of Town Plan No. 1 (1955), LEGO bricks have gone on to become a global phenomenon, and the favorite building toy of children, as well as many an AFOL (Adult Fan of LEGO). LEGO has also become a medium into which a wide number of media franchises, including Star Wars, Harry Potter, Pirates of the Caribbean, Batman, Superman, Lord of the Rings, and others, have adapted their characters, vehicles, props, and settings. The LEGO Group itself has become a multimedia empire, including LEGO books, movies, television shows, video games, board games, comic books, theme parks, magazines, and even MMORPGs. *LEGO Studies: Examining the Building Blocks of a Transmedial Phenomenon* is the first collection to examine LEGO as both a medium into which other franchises can be adapted and a transmedial franchise of its own. Although each essay looks at a particular aspect of the LEGO phenomenon, topics such as adaptation, representation, paratexts, franchises, and interactivity intersect throughout these essays, proposing that the study of LEGO as a medium and a media empire is a rich vein barely touched upon in Media Studies.

In 1914, Tom Thomson spent the summer at a family cottage on Lake Huron's Georgian Bay, where he taught the ten-year-old daughter, Helen, how to paint. Author Susan Vande Griek and illustrator Pascal Milelli have imagined this time through Helen's eyes, providing an intriguing glimpse into the famous painter's life. Helen and her father greet their visitor on the rocks of West Wind Island. She is fascinated by everything about him — his canoe full of gear, his paint-stained hands, his campfire stew. Over the next few days she watches as Tom paddles off to fish and clambers over the rocks to paint. And then he invites Helen to paint with him — wildflowers blooming near the cottage, boats rocking in the water, pine trees blowing in a storm. And at summer's end, he leaves her with a memento of their time together. The story, told in lyrical free verse, has a quiet charm, while the illustrations capture the natural beauty that inspired some of Thomson's most memorable paintings. An author's note provides more information about Tom Thomson's life.

BrickJournal #51, the magazine for LEGO enthusiasts, revisits STEAMPUNK with guest editor and builder GUY HIMBER! It's the follow-up to our sold-out issue #16, where we'll be talking to PAUL HETHERINGTON about his cover model "Unchain My Heart," as well as catch up with ROD GILLIES and his latest Steampunk work, and look at the creations of other top builders! Plus: AFOLs ("Adult Fans of LEGO") by cartoonist Greg Hyland, step-by-step "You Can Build It" instructions by Christopher Deck, BrickNerd's DIY Fan Art, Minifigure Customization with Jared K. Burks, and more!
