The first love in our lives is our mother. Recognizing her face, her voice, the meaning of her moods, and her facial expressions is crucial to survival. Dr. Christine Ann Lawson vividly describes how mothers who suffer from borderline personality disorder produce children who may flounder in life even as adults, futilely struggling to reach the safety of a parental harbor, unable to recognize that their borderline parent lacks a pier, or even a discernible shore. Four character profiles describe different symptom clusters that include the waif mother, the hermit mother, the queen mother, and the witch. Children of borderlines are at risk for developing this complex and devastating personality disorder themselves. Dr. Lawson's recommendations for prevention include empathic understanding of the borderline mother and early intervention with her children to ground them in reality and counteract the often dangerous effects of living with a "make-believe" mother. Some readers may recognize their mothers as well as themselves in this book. They will also find specific suggestions for creating healthier relationships. Addressing the adult children of borderlines and the therapists who work with them, Dr. Lawson shows how to care for the waif without rescuing her, to attend to the hermit without feeding her fear, to love the queen without becoming her subject, and to live with the witch without becoming her

Have you been deeply hurt by your mother? Did the woman, who should have loved you, nourished you and protected you inflict traumas that still affect your life today? Are you struggling every day to repair the damage that she caused? If you were raised by a BPD parent, your childhood would more than likely have been an unstable and painful experience. Children raised by mothers with borderline personality disorder are at risk of developing the same kind of emotional problems. They may find themselves facing seemingly insurmountable obstacles in order to overcome their parent's dysfunctional attitudes, and it may be necessary to seek professional help to work on such feelings. Adult children of BDP parents are often afflicted with so much guilt and such a strong sense of profound obligation and shame that they feel obliged to keep secret all that has happened in the family, even when it is destroying their lives. These people can find it really difficult to share their experiences because mothers with BPD are usually very good at creating the perfect family image for outsiders to the family. I advise you to read this book if any of these symptoms sound familiar: - Sudden unexplained anxiety followed by rapid falls into depression. - Doubting yourself and your sanity. - Mood swings. - Endless and repetitive obsessive

Being partnered with a narcissist or borderline personality can be hard enough, but learning how to shield children from the fallout is paramount. Here, the authors show readers how to manage parenting when a narcissistic or borderline partner is part of the equation. Life in a narcissistic family system is at best challenging, and too often filled with chaos, isolation, emotional outbursts, and rigid controlling behaviors. It is too often devoid of peace and emotional safety. In the worst outcomes, children in these families grow up with low self-worth, issues with trust and belonging, and a lack of self-compassion. They are at significant risk of carrying the cycle forward and having poor adult relationships. This book offers a way to intervene and disrupt the cycle of negative outcomes for children. Written by two family therapists who bring a combined total of sixty years of clinical practice with individuals and families, the book pulls no punches, giving clear-headed advice, easy to follow actions to help children, and an abundance of teaching examples. Instead of the doom and gloom scenarios often presented about life with a narcissist or borderline, this book provides a much more positive outlook, and most importantly, it offers hope and a path to an entirely different outcome for the family members. Supported by current research in neuroscience, mindfulness and parenting information, the book focuses on teaching resilience and self-compassion to raise emotionally healthy children, even in a narcissistic family system. It starts by helping parents get a clear understanding of what they face with a narcissistic or borderline partner. There is no room here for denial, but there are also many options to explore. It explains how and why the narcissistic family system functions so poorly for raising healthy children, and pinpoints the deficits while providing information on how to intervene more effectively for the benefit of the children. Using their years of experience, the authors present ideas for staying together as well as knowing when to leave the relationship and how best to do that. Emphasis throughout the book is on supporting and strengthening the reader with encouragement, concrete ideas, skills and
