What Is Sustainability and Why Is It Important ...

The Importance of Sustainability "Sustainability" in its broadest sense is the capacity to endure, to maintain a process or situation over time. In ecology, a sustainable system is a system whose biodiversity and productivity are preserved over time. Long-lived and healthy wetlands and forests are examples of sustainable biological systems.

The Importance of Sustainability - Strauss Group

The second main reason why businesses now recognise the importance of sustainability and the integration of social and environmental sustainability-related issues into core business activities as an essential part of developing business strategies is because of the Business Case for Sustainability.

Why Sustainability is Important in Business – Kent ...

Sustainable development has continued to evolve as that of protecting the world's resources while its true agenda is to control the world's resources. Environmentally sustainable economic growth refers to economic development that meets the needs of all without leaving future generations with fewer natural resources than those we enjoy today.

What is the Importance of Sustainable Development?

Contrary to popular belief, sustainability is more than just environmentalism, and recognises the roles of social and economic dimensions in delivering long-term prosperity. Sustainability is a growing priority to business leaders, with many companies actively integrating sustainability principles into their organisations.

The value of sustainability to business

Sustainability is important because it ensures people have water and resources, and adopting its practices protects the environment and human health. The doctrine of sustainability aims to maintain the conditions in which nature and humans can survive by appropriately utilizing the natural components of the environment.

Why Is Sustainability Important? - Reference.com

Sustainability is becoming more important for all companies, across all industries. 62% of executives consider a sustainability strategy necessary to be competitive today, and another 22% think it will be in the future. Simply put, sustainability is a business approach to creating long-term value by taking into consideration how a given organization operates in the ecological, social and economic environment.

Why all businesses should embrace sustainability

Sustainable development is the practice of using guidelines for environmentally responsible and energy savings to create new development projects and to maintain and retrofit older projects.
