IPC Users Guide. Inter-Processor Communication (IPC) provides a processor-agnostic API which can be used for communication between processors in a multi-processor environment (inter-core), communication to other threads on same processor (inter-process), and communication to peripherals (inter-device). The API supports message passing, streams, and linked lists.

to peripherals. This communication includes message passing, streams, and linked lists. These work transparently in both uni-processor and multi-processor configurations.

The IPC product contains an examples/archive directory with device-specific examples. Once identifying your device, the examples can be unzipped anywhere on your build host. Typically once unzipped, the user edits the example's individual products.mak file and simply invokes make.

IPC can be used to communicate with the following:
other threads on the same processor.
threads on other processors running SYS/BIOS.
threads on GPP processors running a High-Level Operating System (HLOS)
IPC was designed with the needs of a wide variety of users in mind.

The ti.sdo.ipc.Notify module manages the multiplexing/demultiplexing of software interrupts over hardware interrupts. In order to use any Notify APIs, you must first call Ipc_start(). This sets up all the necessary Notify drivers, shared memory, and interprocessor interrupts.

IPC provides an implementation of the IMessageQTransport interface called ti.sdo.ipc.transports.TransportShm (shared memory). You can write other implementations to meet your needs. When a transport is created via a transport-specific create() call, a remote processor ID (defined via the MultiProc module) is specified.

Overview. IPC is a generic term of Inter-Processor Communication referred widely in the industry, but also a package in TI Processor SDK for multi-core communication. In generic usage, there are different ways for multi-core communication such as OpenCL, DCE, TI-IPC, and etc. In TI's IPC package, it uses a set of modules to facilitate the inter-processor communication.
