Money and journalistic integrity have often been at odds throughout history. Yet today, with newspaper business models struggling, there has been more tension than ever. This book goes behind the scenes and teaches readers about past and present newspaper profit models, and how big money can influence reporting and public opinion. Also addressed are new battlegrounds in the profit wars such as net neutrality and innovative business models such as hyperlocal news. This book asks the questions that no one else will and digs deep for the answers.

In this edition, Meyer's analysis of the correlation between newspaper quality and profitability is updated and applied to recent developments in the newspaper industry. Meyer argues that understanding the relationship between quality and profit is central to sustaining journalistic excellence and preserving journalism's unique social functions. -- Provided by the publisher.

As author Philip Meyer sat in a college class listening to a professor lecture about systematic tools for measuring things like trust in government, a thought struck him: a journalist could do this! He thought about the newsroom conversations he ' d had about the possibility of reporting on some interesting social phenomena. The group always ended with a shrug and a lament that there was no way to measure it—but he began to wonder. It was an epiphany for Meyer, who went on to report on the 1967 racial riots in Detroit and write the groundbreaking book Precision Journalism. While others were arguing that reporters should not use scientific methods to make conclusions of their own, Meyer was using computers and statistical software to elevate the standards of traditional journalism. At age fifty, he switched gears and entered the world of academe, where he continues to stir the pot. In Paper Route, he recalls two interconnected careers and examines how journalism, quantitative methods, and original thinking led him to live the remarkable life that he ' s still enjoying.

'For those who know about provincial newspapers, this will be a classic and a gem. Those who don't know will envy what they have missed' MELVYN BRAGG 'BrisK and entertaining. A very readable love letter to a disappearing world, told with verve and tenderness' STUART MACONIE, author of Pies and Prejudice 'Gut-bustingly funny, poignant and packed with astonishing insider information' M. W. CRAVEN, author of the award-winning The Puppet Show 'Local journalism has never seemed more exotic than in this part-memoir, part-ode to that disappearing art, which is as funny as it is endearing . . . Told with a tender fondness, the bonkers, baffling but vital world of local press is paraded with the style that it deserves' JONATHAN WHITELAW, Sun 'Refreshingly honest, engagingly self-deprecating, tremendously funny and more than a little heartbreaking. By far my favourite read of the year so far' MIKE WARD, TV critic, Daily Express/Daily Star 'Local publishers . . . need to hold on to thoughtful, dedicated writers such as Roger Lytollis, or his book will be an epitaph to a centuries-old industry' IAN BURRELL, i paper 'Anyone who has ever worked at a local newspaper, or wondered what it is like, should read this book' DOMINIC PONSFORD, media editor at New Statesman Media Group/editor-in-chief at Press Gazette '[Lytollis] writes with clarity, comically self-effacing honesty and surprising poignancy. . . [this is] the story of what it is like to love what you do, and be great at it, and to watch it collapse around you in slow motion' ROBYN VINTER, Guardian 'For anyone wondering where their local press went, this is as clear an account of how it was pickpocketed, drained of blood, and left to die as you'll find' ED NEEDHAM, Strong Words magazine 'Panic as Man Burns Crumpets gives a powerful, if not to say dismaying, overview of an industry in terminal decline' NAT SEGUNIT, Times Literary Supplement You dreamed of being a journalist and the dream has come true. You love working for your local paper . . . although not everything is as you imagined. You embrace yourself with a range of celebrities, from John Hurt to Jordan. Your best story is 'The Man With the Pigeon Tattoo'. A former colleague interviews President Trump. You urinate in the president of the Mothers' Union's garden. Your appearance as a hard-hitting columnist on a BBC talk show does not go well. And being photographed naked is only the second most humiliating thing to happen one infamous afternoon. There are serious stories, such as a mass shooting, a devastating flood, and the search for Madeleine McCann. Meanwhile local papers are dying. Your building is crumbling and your readership is dwindling. Your carefully crafted features are read by fewer people than a story about fancy dress for dogs. Panic as Man Burns Crumpets is the inside story of local newspapers during the past twenty-five years, told in a way that's funny, poignant and revealing.

America's community newspapers have entered an age of disruption. Towns and cities continue to need the journalism and advertising so essential to nurturing local identity and connection among citizens. But as the business of newspaper publishing collides with the digital revolution, and as technology redefines consumer habits and the very notion of community, how can newspapers survive and thrive? In Saving Community Journalism, veteran media executive Penelope Muse Abernathy draws on cutting-edge research and analysis to reveal pathways to transformation and long-term profitability. Offering practical guidance for editors and publishers, Abernathy shows how newspapers can build community online and identify new opportunities to generate revenue. Examining experiences at a wide variety of community papers—from a 7,000-circulation weekly in West Virginia to a 50,000-circulation daily in California and a 150,000-circulation Spanish-language weekly in the heart of Chicago—Saving Community Journalism is designed to help journalists and media-industry managers create and implement new strategies that will allow them to prosper in the twenty-first century. Abernathy's findings will interest everyone with a stake in the health and survival of local media.

The concept of boundaries has become a central theme in the study of journalism. In recent years, the decline of legacy news organizations and the rise of new interactive media tools have thrust such questions as "what is journalism" and "who is a journalist" into the limelight. Struggles over journalism are often struggles over boundaries. These symbolic contests for control over definition also mark a material struggle over resources. In short: boundaries have consequences. Yet there is a lack of conceptual cohesiveness in what scholars mean by the term "boundaries" or in how we should think about specific boundaries of journalism. This book addresses boundaries head-on by bringing together a global array of authors asking similar questions about boundaries and journalism from a diverse range of perspectives, methodologies, and theoretical backgrounds. Boundaries of Journalism assembles the most current research on this topic in one place, thus providing a touchstone for future research within communication, media and journalism studies on journalism and its boundaries.

Winner of the National Press Club's Arthur Rowe Award for Press Criticism! From Craig Silverman, proprietor of www.RegretTheError.com, comes a lively journey through the history of media mistakes via a chronicle of funny, shocking, and often disturbing journalistic slip-ups. The errors—running the gamut from hilarious to tragic—include " Fuzzy Numbers " (when numbers and math undermine reporting) " Obiticide " (printing the obituary of a living person), and " Unintended Consequences " (typos and misidentifications that create a new, incorrect reality). While some of the errors are laugh-out-loud funny, the book also offers a serious investigation of contemporary journalism's lack of accountability to the public, and a rousing call to arms for all news organizations to mend their ways and reclaim the role of the press as honest voice of the people.

This book looks at how numbers and statistics have been used to underpin quality in news reporting. In doing so, the aim is to challenge some common assumptions about how journalists engage and use statistics in their quest for quality news. It seeks to improve our understanding about the usage of data and statistics as a primary means for the construction of social reality. This is a task, in our view, that is urgent in times of ' post-truth ' politics and the rise of ' fake news '. In this sense, the quest to produce ' quality ' news, which seems to require incorporating statistics and engaging with data, as laudable and straightforward as it sounds, is instead far more problematic and complex than what is often accounted for.
