Walking the Rim. March 21, 2014. More fun at the big ditch. We shuttled around the east side of the park out to Yaki Point and then back to Pike Creek Vista where we got off the bus and walked back to Kaibab trail head. There are two trails down into the canyon, Kaibab in the east and Bright Angel in the west.

Indian Garden to the South Rim (5 miles): 2.75 hours; We also spent 30 minutes at Phantom Ranch and 30 minutes at Indian Garden, for a grand total of almost 11 hours. Our favorite section was at the very beginning of the hike. Walking down the North Kaibab Trail in the cool morning hours, along the crazy trail on the cliffs was so much fun.

In most spots, rim walks are relatively easy. Treks spontaneous or long can be crowded at times (especially sunset at specific points) but still offer ample opportunities for solitude and reflection. "It's awesome. I know that's not quite the right word, maybe 'speechless,'" Joe Farrey of Dayton, Ohio, said during a walk along the South Rim.

Walk the Grand Canyon's South Rim. Take in the beauty of the Grand Canyon at your own pace by walking the trail along the canyon rim. Some portions of it are paved, others are not. Some sections of the trail are part of a paved greenway, which is great if you want to bike as well. One section of the trail, beginning at Yavapai Point, is designated the Trail of Time and features markers and exhibits designed to give you a sense of perspective about the canyon's formation, geology and history.

The easiest is the Rim Trail, a relatively flat walk that meanders along the rim taking in many different lookouts. However, the truly special ones are those that go below the rim which can be tackled with a stay at the bottom of the canyon (either at Phantom Ranch or camping - both require advanced reservation) or in part on a day hike.

The 165-mile Tahoe Rim Trail is considered one of the world's premier trails. Accessible by hikers, equestrians, skiers and mountain bikers (for the non-wilderness portions), it winds completely around spectacular Lake Tahoe, the highest and largest alpine lake in North America. The trail crosses through six counties, three national forests, and two states and was completed in 2001 largely by volunteer labor. The best-selling Tahoe Rim Trail has been revised to reflect the latest conditions and routing of the trail and includes information for over 20 miles of new trail. Updated topographic maps depict the entire route, along with the easy (and fun) to read trail directions, the book includes fascinating information on the plants and animals you'll see along the trail, plus essential advice for planning a hike on the TRT, whether it's a day's outing or a 2-week circuit of the entire lake. The first and only how-to guide to this popular trail, it is the official guidebook of the Tahoe Rim Trail Association, whose mission is to improve, maintain and promote the trail.

While on a family summer camping trip, Rudy is separated from his family when an earthquake strikes.

This is a once-in-a-lifetime experience--an end-to-end, rim-to-river exploration of the Grand Canyon. Award-winning photographer Pete McBride, along with best-selling authors Kevin Fedarko and Hampton Sides, takes us on a gripping adventure story told through stunning, never-before-seen photography and powerful essays. By hiking the entire 750 miles of Grand Canyon National Park--from the Colorado River to the canyon rim--McBride captures the majesty of as well as calling us to protect America's open-aired cathedral. This is the most spectacular collection of Grand Canyon imagery ever seen, showing beauty from vantages where no other photographers have ever stood. It will also highlight the conservation challenges this iconic national park faces as visitation numbers grow and development pressures surrounding it mount. This photography will inspire and remind us why we protect such a cherished public space. Proceeds benefit the Grand Canyon Association, and an accompanying documentary will tentatively release at Sundance in 2018--all in time for the national park's centennial.

The next step in the journey brought us to a sturdy Park Service bus waiting nearby. According to guidebooks, this bus would carry us to the top of the South Kaibab Trail. Amy and I climbed up the steps and down the narrow aisle lugging our backpacks loaded with sleeping mats, clothes and food. The water, a gallon for each of us, gurgled reassuringly in plastic bottles. We sat down near the back of the bus. After waiting for late arrivals, the bus driver closed the squeaky door, started the bus, glanced at the rear-view mirror and shifted the gears. The driver, a frumpy, middle-aged woman with hints of gray in her hair, started her route with a slight lurch of the bus. Even at this early hour, several people got on and off at various trailheads and scenic overlooks that lined the rim of the Canyon. The driver seemed relaxed and friendly. I felt a mixture of rising anticipation and panic sweep over me as we moved from the known into the unknown. One part of me felt giddy with exhilaration as we neared the trailhead. Another cautious part inside wanted answers and a reassurance I could not supply. This voice began with the usual question, Now what did we forget to pack? Other questions nagged at me beneath the surface. What am I doing? Am I getting in way over my head? I felt embarrassed and reluctant to share my reservations with Amy at this early stage of our journey. Amy silently gazed out the window as the bus bumped along. Several other people on board spoke quietly, but with eager, nervous voices. One younger couple sat quietly, staring out at the passing trees, clear sky and a few scattered park buildings. Time seemed to shift during that ride to the top of the South Kaibab trail. Even through the windows, the views from the top of the Canyon were magical. The elevation on the South Rim of the Canyon reached over 7,000 feet. At certain points, we saw visitors walking along the edge to admire the scenery. I had visited the Canyon just once during a winter vacation to Arizona with my ex-wife just a few years before. Unfortunately, the trail was icy at the time and we cautiously hiked down only a short distance before turning back. Like most awestruck tourist, I spent the previous visit walking along the rim, snapping too many pictures and admiring the views from the top of the Canyon. As we gazed out the window of the bus, I could catch glimpses of the same views that enchanted me years before. I recalled that at certain points along the rim you could catch a glimpse of the Colorado River almost a mile below, although the folds and contours of the Canyon walls usually hide it. During the ride, all of our plans for hiking down into the Canyon took on a new reality. I finally realized in the pit of my stomach that we were really going on this trek and that we were going to be descending an entire mile in elevation carrying a heavy backpack every step of the way. To calm my inner turmoil, I reviewed once again why we had chosen the South Kaibab Trail to reach the Colorado River. For one thing, it offered a rich history. The South Kaibab consisted of a six-mile hike down a steep track first used by natives who, legend has it, followed a game path into the Canyon. Later, in the nineteenth century, miners searching for gold and silver widened and developed the trail. By the beginning of the twentieth century, most of the mines proved unprofitable and the miners abandoned them. However, the trails the miners developed became popular with the growing number of tourists drawn to the Canyon. During the 1930s, the park service started improving and maintaining a number of these trails into the Canyon, including the South Kaibab Trail. The South Kaibab quickly gained a reputation for its beauty. Many hikers selected this route because, unlike other popular routes, it often followed ridgelines and offered a number of unobstructed views of the Canyon. However, the trai

William Cathcart-Rake shares his memories of a half-century of hiking in the Grand Canyon. During that time he spent sixty days and walked five hundred miles below the rim. As he recounts his thoughts and experiences of eighteen separate treks below the rim, he includes many fascinating facts about the Canyons natural and human history. As the years go by, the author discovers that the Canyon has more to offer than just being a challenging place to hikeit becomes a sanctuary for reflection and renewal. His time in the canyon is more than days below the rim, miles walked, switchbacks negotiated, stream crossings, walking speed, and pounds carried. Conquering the canyonan impossible and foolish questceased to be a goal. He returned to the canyon because of the effect it had on him, not because of what he could do in it or to it. The canyon allowed him to discover his ability to persevere despite discomfort, afforded an opportunity to learn more about the natural world we live in, and gave him a deeper appreciation of the need to seek the solace afforded by sauntering below the rim.

Many backpackers dream of taking epic, once in a lifetime thru-hikes that take months and cover thousands of miles. The author is not one of those people. For Jim Rahtz, the best thru-hikes are those that are still epic, but take only weeks, rather than months to complete. The Tahoe Rim Trail (TRT) is one of those trails. At 170 miles, the distance is less intimidating than many, but the experience is still amazing. This is a dream trip for anyone that wants to immerse themselves in a possibly life changing adventure, but doesn't want to give up the life they have to do it. Make no mistake, this trail is not an easy hike. It weaves through the Sierra Nevada after all. However, the scenery is amazing, thru-hike logistics are simpler than most and navigation is straight forward. Come along and discover all the specific challenges and rewards of a thru-hike around the TRT. Be warned, however. Once you've finished this short book, your bucket list may have gotten a little longer.

Fine, detailed guide to all the recognizable trails in the park (most are not maintained, some barely perceptible). Introduced by warnings, geology, maps, camping, planning. The hikes section begins with a general description, distance, difficulty, hiking time, condition, elevation change, water availability, water cache spots, best season, camping regulations, map's, mileage of key points, and elevation profile. The hike description covers quality of trail, general route, intimate view of obscure places, plants, geology, camp sites realistic hiking times. Falcon has released four other Hiking ... guides recently: Yellowstone, and Oregon's Three Sisters Country, as well as Touring California & Nevada Hot Springs.
