WebSphere Application

WebSphere Application Server (WAS) is a software product that performs the role of a web application server. More specifically, it is a software framework and middleware that hosts Java -based web applications. It is the flagship product within IBM 's WebSphere software suite.

IBM WebSphere Application Server - Wikipedia

When you start developing IBM MQ applications, you ' re going to need a queue or a topic that your application can interact with. IBM MQ queues and topics are hosted on queue managers. A queue manager is a server that hosts queues and topics. Your application will connect to IBM MQ as a client.
